Dear Pooja,

I am excited to be applying for the Software Development Engineer position at Amazon. As someone who has spent years programming my own computer games and is highly focused and attentive to detail, I am confident that I will be an excellent fit for the position. I am thrilled at the opportunity to show off my technical expertise and team skills as part of Amazons expert team.

During my studies at Seattle Central College I excelled in my programming classes. In one instance, my midterm assignment was to write a program that would allow the user to enter the name of a student in a registry and would both display their current numeric grade and allow the user to replace it with a new grade. While the assignment did not ask for it, I also programed in an error message if the user entered a name that was not in the registry and prompt the user to reenter the name of a student.

Thank you for your time and consideration. I'm looking forward to learning more details about the Software Development Engineer position at Amazon. I'm excited about the opportunity to leverage my unique range of skills, and I'm eager to demonstrate my commitment to developing world-class solutions for Amazon.

Best regards,

Alexander Baker
